In the paper of B. M. Vul and É. I. Zavaritskaya, published in Vol. 37, No. 12, the following error was missed. In the last column of Table I on p. 683, the notation  $W/k$ ,  $K$  should be substituted for  $W$ , meV, where  $k$  is the Boltzmann constant, and  $K$  is the temperature in degrees Kelvin.
