Article by A.A. Grigoryan and A.B. Kaidalov, Possibility of existence of exotic baryon resonances with isospins $I \geq 5/2$, Vol. 28, No. 5, p. 294. Formulas (3), (5), and (6) should read

$$G_{\lambda_a \lambda_a \pm 1}^{1 a a_j \Delta} = (\mp 1)^{(\sigma_j P_j - 1)/2} G_{\lambda_a \lambda_a \pm 1}^{1 a a \rho \Delta} \quad (j = A_2, \pi) \quad (3)$$

$$G_{\lambda \lambda \pm 1}^{1 \Delta a_j E} = \beta \left[\pm (\mp 1)^{(1 + \sigma_j P_j)/2} \sqrt{3} C_{1 \pm 1 \ 3/2 \ \lambda}^{5/2 \lambda \pm 1} \right] \quad (5)$$

$$G_{\lambda \lambda \pm 1}^{1 E a_j E} = 3\sqrt{\frac{5}{7}} (\mp 1)^{(1 + \sigma_j P_j)/2} C_{2 \lambda \pm 1/2 \ 1/2 \ \mp 1/2}^{5/2 \lambda} C_{2 \lambda \pm 1/2 \ 1/2 \ \pm 1/2}^{5/2 \lambda \pm 1} \quad (6)$$
